

# Microsoft (MSFT)

INCREASE TARGET PRICE

# New CS Survey: Cloud Mo to Continue in 2018; What Will MSFT Do with the Cash? Increase TP

- CS Survey Commercial Cloud Momentum to Continue: Our new, proprietary survey (historically our surveys have been good leading indicators of business trends) suggests that momentum in MSFT's Commercial Cloud businesses should continue throughout 2018, at least. Specifically, AWS / Azure continue to lead the cloud market (81% of respondents name them as preferred vendors, up from 72% six months ago and 70% last yr). Additionally, 47% and 35% have already adopted Office 365 and Windows 10, respectively (a large uptick from six months ago), while 37% still plan to upgrade to O365 within 24 months (also up from 36%), which gives us increased confidence in our O365 MAUs forecast of ~160M by FY19. Interestingly, >50% indicated they would upgrade to the next O365 subscription pricing tier for better features/products, suggesting monetization of the O365C user base remains in the very early innings.
- What MSFT Could Do with the Cash. If MSFT repatriates some or all of its overseas cash (~\$132B held by foreign subsidiaries, ~\$112B net of tax), it could issue a one-time, \$14+ per share special dividend, although we view something that large as unlikely, and expect a combination of a smaller one-time dividend (\$6-9) combined with an increase in share buybacks. We do not view this as a catalyst for an uptick in M&A activity at MSFT specifically.
- **Top Large Cap Pick:** Our Outperform thesis on MSFT shares is centered on what we view as strong cash flow growth and earnings power potential over the next several yrs, which could be unlocked from (1) significant Commercial Cloud growth, and (2) higher cloud gross margins over time.
- Microsoft is scheduled to report F2Q18 results on Wed, January 31.
- We expect FQ2: Total revenue of \$28,453M (+10.2% yr/yr) vs. Street of \$28,389M; P&BP of \$8,916M (+24.2%), which includes \$1,200M revs from LinkedIn; IC of \$7,528M (+11.4%); MPC of \$12,008M (+1.0%). We model GM% of 60.7% vs. guide of 60.4-60.8%; EPS of \$0.86, in line with Street.
- Valuation: Our new \$115 TP (from \$95) implies a C2018 EV/OCF multiple of 17.6x, EV/FCF multiple of 23.6x, and P/E multiple of 28.6x (excl. SBC).

17.6x, EV/FCF multiple of	of 23.6x, and I	P/E multiple of 2	28.6x (excl. \$	SBC).

# I. New Enterprise Software Survey: Expect Sustained Strength in Commercial Cloud

We recently conducted an update to our software survey of enterprise executives (CIOs, CTOs, and IT Directors; see page 13 for survey demographics), which suggests that MSFT's Commercial Cloud (Azure, Office 365 Commercial, and Dynamics 365) momentum should continue through 2018, at least (this update surveyed ~70% of the same respondents from the previous survey in July 2017).

Specifically, we note that Microsoft Azure, along with Amazon AWS (Ju, Outperform), continue to command significant mindshare among large enterprises, as 81% of respondents indicated that Azure / AWS was their preferred cloud vendor (up considerably from 72% six months ago and 70% the prior year); this reaffirms our thesis that the market is growing/maturing rapidly and continues to consolidate around the current market leaders (see The Microsoft Cloud Forms and Grows). While we didn't see the same level of improvement we saw in MSFT six months ago (recall previously that 40% of respondents indicated that Azure was their preferred cloud vendor, up nearly double from 21% in early 2017, which was a good leading indicator of Azure's strength – see MSFT: CS Survey Suggests Inflection Point for Azure and MSFT: FQ4 Results Strong with Commercial Cloud Growth (Azure) Reaccelerating), our new, proprietary survey data gives us increased confidence that growth in Azure should remain robust over the next several qtrs, at least (CS forecasts Azure to reach \$1.498B revenue (+85.9% yr/yr) in F2Q18 and \$7.006B revenue (+82.7% yr/yr) in F2018. Lastly, we do not expect much upside to Server Products over the next few qtrs (CS ests +1.5% yr/yr in F2Q18 and down -2.5% yr/yr in F3Q18 as MSFT laps tough yr/yr compares). We continue to expect Azure to gain market share in the laaS/PaaS markets due to its competitive differentiators (i.e., hybrid-cloud platform, enterprise-grade capabilities, and hyperscale infrastructure) and market/product positioning (i.e., open ecosystem, interoperability, and enterprise edge / IoT).

New CS IT Survey: Amazon AWS and Microsoft Azure continue to lead the market, accounting for 81% of respondents (up from 72% in July).

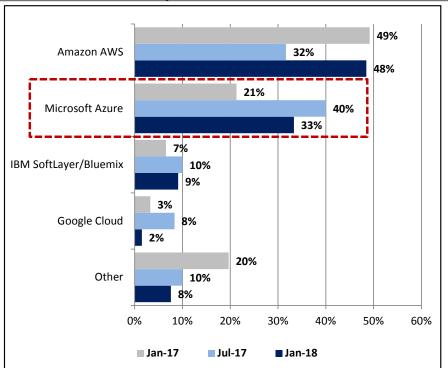

Figure 1: \*NEW Data\* – Who is your cloud vendor of choice?

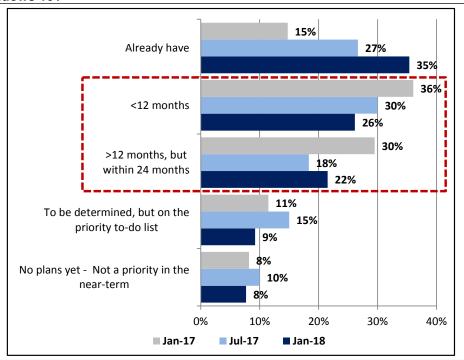

Source: Credit Suisse estimates, GLG.

With regards to the Windows 10 upgrade cycle, 35% of respondents are now on the new operating system (up from 27% six months ago and 15% the prior year) as MSFT continues to make steady progress on Windows 10 penetration at large enterprises. 48% of enterprise respondents plan to upgrade their organization to Windows 10 within the next 24 months (vs. 48% from six months ago and 66% the prior year), while 9% noted that upgrading to Windows 10 was a priority but haven't set a date yet (vs. 15% six months ago and 11% the prior year).

New CS IT Survey: Steady progress on Windows 10 adoption with 35% respondents on the new OS (up from 27% six months ago).

Figure 2: \*NEW Data\* – When do you plan to upgrade your company to Windows 10?

Source: Credit Suisse estimates, GLG.

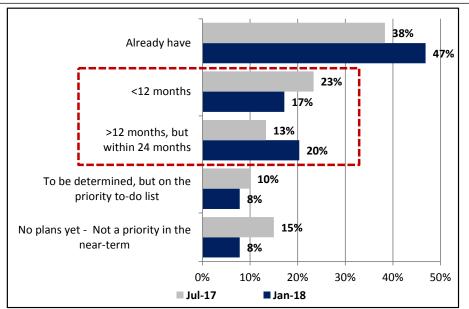

# Office 365 Penetration to Continue Unabated; Higher Subscription Tiers = Long-term Revenue Opportunity

Regarding Microsoft's Office 365 commercial user penetration, 47% of enterprise respondents have already migrated to Office 365 (up from 38% six months ago), 37% plan to upgrade within the next 24 months (up slightly from 36% six months ago), while 8% noted that upgrading was a priority but haven't set a date yet (down slightly from 10% six months ago). These survey results suggest that Office 365 Commercial penetration continues unabated and give us further confidence in our Office 365 Commercial Monthly Active Users (MAUs) forecasts of ~138M in FY18 and ~160M in FY19 (see Figure 21 for MSFT key operating metrics reference sheet).

While our proprietary bottom-up model suggests that Office 365 Commercial has been one of the leading drivers of gross profit dollar growth over the past few years, we expect that momentum to continue due to (1) increased user penetration over the medium-term (CS ests FY17-19 Office 365 Commercial MAU CAGR of +21%), followed by (2) further monetization / upsell opportunity through higher-tier subscription plans longer-term, as indicated by our new survey work.

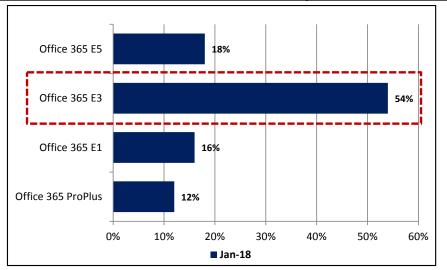

Figure 3: \*NEW Data\* – When do you plan to upgrade your company to Office 365?

# Favorable End Markets; Microsoft Expected to Gain the Most Wallet Share, According to CS IT Survey

Additionally, we believe that MSFT is one of the few software vendors that has a strong portfolio and presence in all three cloud markets: laaS, PaaS, and SaaS. (See <a href="The Microsoft Cloud Forms and Grows">The Microsoft Cloud Forms and Grows</a>.) Our new survey suggests that collaboration apps, email, CRM/sales force automation apps, IT help desk, and personal productivity apps are the top five most likely use cases that enterprises plan to migrate to the cloud. We believe that MSFT is well-positioned to capture some market share in these growing markets, particularly given its recent product investments and go-to-market efforts to better align with its cloud growth strategy.

Microsoft is leveraged to attractive end markets and is wellpositioned to capture market share with its breadth of offerings.

Figure 7: \*NEW Data\* Rate the likelihood of migrating the following use cases to the cloud over the next three years. (1 = not likely, 5 = most likely)

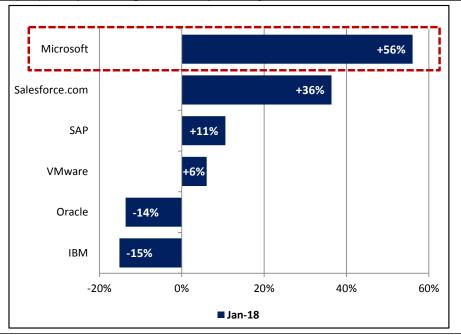

Source: Credit Suisse estimates, GLG

Lastly, we surveyed respondents regarding which software providers do they expect to gain and lose wallet share (as a percentage of total spend) at their respective organizations. 56% of respondents (net) expect MSFT to gain the most wallet share, the highest among mega cap software providers.

Microsoft expected to gain the most wallet share among mega cap software providers.

Figure 8: Which software providers do you expect to gain (+) / lose (-) wallet share (net) as a percentage of total spend at your firm?

Source: Credit Suisse estimates, GLG.

# II. What Will Microsoft Do with All the Overseas Cash it Repatriates, Potentially?

Following the 2004 tax repatriation holiday, MSFT announced (1) a one-time special dividend payment of ~\$32B (\$3 per share), (2) a repurchase program of up to \$30B over the next four years, and (3) that it intended to double its quarterly dividend (worth ~\$3.5B). Using history as our guide, and assuming MSFT will repatriate a portion, or all of its earnings overseas and return some excess cash (currently \$132.1B cash is held by foreign subsidiaries, ~19% of market cap) to shareholders, we think investors could expect similar future actions. (See Figure 9.)

Assuming MSFT repatriates back to the U.S. most of the cash its holding overseas and pays the 15.5% one-time tax to get it here, that would leave ~\$112B, net of tax, or >\$14 per share of cash to potentially return to shareholders, which represents ~16% of the company's share price currently. (See Figure 10.) After the 2004 tax repatriation holiday. MSFT issued a \$3 per share special cash dividend (~\$32B), which at the time represented ~10% of the company's stock price. If MSFT management decides to return 10% of the company's stock price back to shareholders in a one-time special dividend, as the company did back in 2004, that would be \$9 per share, still leaving \$42B to increase their repurchase program over the next few years. Some of our discussions with investors over the last few weeks about this subject suggested that MSFT not issue a special dividend, but increase the regular dividend substantially over a longer period of time so the stock price doesn't pop on the announcement and then slide after the special dividend is potentially paid out. Also recall that MSFT announced that it is renovating its Redmond campus over the next few years, which could cost several billion dollars, but that expenditure would only represent a small portion of the total cash it could potentially repatriate.

One thing we do NOT believe will happen as a result of this tax event is a significant increase or change in MSFT's M&A activity or strategy given (1) its already low cost to borrow, (2) a less programmatic M&A strategy to acquire market share, and (3) previous M&A history (i.e., no 'transformative' acquisitions prior to 2007 with aQuantive), which is also consistent with mgmt's recent commentary. However, we do believe that MSFT will continue to opportunistically acquire smaller cloud assets and relevant Artificial Intelligence (AI) technologies.

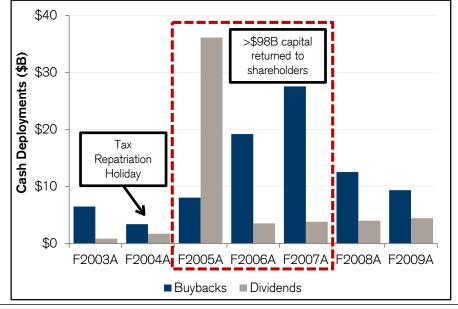

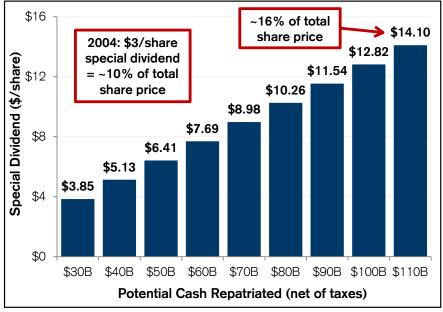

Figure 9: Microsoft's Cash Deployment After 2004 Tax Repatriation Holiday

Source: Company data, Thomson Reuters, Credit Suisse estimates.

Figure 10: Microsoft Could Issue a One-time Special Cash Dividend of \$14+/sh \$16 ~16% of total

Source: Company data, Credit Suisse estimates.

### ■ CFO Amy Hood (December 5, 2017):

"It (tax reform / cash repatriation) won't change how we think about our M&A strategy. When we see assets that make sense to us, when we feel they're fundamental to growing our business, when we feel we're a better owner than someone else because of where they fit, how they fit, that is what will dictate whether a deal makes sense to us... I don't want to wait for tax reform to buy smart assets, and many assets won't make any more sense or any less sense in a new environment.

## III. Top Large Cap Pick for 2018

Our bullish thesis on MSFT shares is centered on what we view as strong cash flow growth and earnings power potential over the next several years, which could be unlocked from (1) significant commercial cloud growth (Azure, Office 365 Commercial, Dynamics 365), and (2) higher cloud gross margins over time due to economies of scale, ultimately leading to accelerating gross profit dollar growth and driving our above-consensus EPS estimates.

Our new \$115 target price is based on a blended average, using 50% of our discounted cash flow (DCF) valuation (10.9% WACC, 3.0% terminal growth) and 50% of our weighted relative multiple. Our new target price implies a P/E multiple of 31.8x on our C2018 estimate (or 28.6x excluding SBC), a warranted premium to that of the group average given our expectations for sustained growth in Commercial Cloud while generating incremental leverage. However, given the cloud transformation at play, we believe that investors should begin to shift their framework for valuing MSFT shares to a cash flow multiple, rather than only using a P/E multiple as an increasing percentage of its business shifts to recurring sources of revenue (i.e., cloud subscriptions – we estimate that by as early as FY22, >50% of MSFT's revenue will be from recurring sources, and >65% by FY25). (See MSFT: Beginning to Build the Case for a Higher Cash Flow Multiple.) As such, our new \$115 target price implies a C2018 EV/OCF multiple of 17.6x and a EV/FCF multiple of 23.6x. (See Figures 11 to 13.)

# Credit Suisse Software Survey of Executives at Enterprises

We recently conducted an update to our survey of enterprise executives (CIOs, CTOs, IT Directors) to determine their spending intentions over the next 24 months for MSFT. The Credit Suisse software survey focuses on enterprises of all sizes (~half of the survey respondents have >10K employees and >\$6 revenue) across all geographies and verticals. This update surveyed ~70% of the same respondents we polled from our July 2017 update.

#### 3-Year Price and Rating History for Microsoft (MSFT.OQ)

MSFT.OQ	Closing Price	Target Price	
Date	(US\$)	(US\$)	Rating
27-Jan-15	42.66	55.00	0
23-Oct-15	52.87	60.00	
29-Jan-16	55.09	62.50	
07-Jul-16	51.38		NC
27-Apr-17	68.27	80.00	0 *
17-Jul-17	73.35	84.00	
27-Oct-17	83.81	95.00	

<sup>\*</sup> Asterisk signifies initiation or assumption of coverage.

Effective July 3, 2016, NC denotes termination of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

### As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and Asia stocks (excluding Japan and Australia), ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR): Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC): Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

Overweight: The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight: The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight: The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	46%	(64% banking clients)
Neutral/Hold*	39%	(61% banking clients)
Underperform/Sell*	13%	(55% banking clients)
Restricted	2%	

\*For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

#### **Important Global Disclosures**

Credit Suisse's research reports are made available to clients through our proprietary research portal on CS PLUS. Credit Suisse research products may also be made available through third-party vendors or alternate electronic means as a convenience. Certain research products are only made available through CS PLUS. The services provided by Credit Suisse's analysts to clients may depend on a specific client's preferences regarding the frequency and manner of receiving communications, the client's risk profile and investment, the size and scope of the overall client relationship with the Firm, as well as legal and regulatory constraints. #### **Target Price and Rating**

Valuation Methodology and Risks: (12 months) for Microsoft (MSFT.OQ)

Method: Our \$115 target price and Outperform rating for MSET is ha

Method: Our \$115 target price and Outperform rating for MSFT is based on the average of our discounted cash flow (DCF) and relative comparable multiple to its peers. For our DCF, we use a weighted average cost of capital (WACC) of 10.9% and 3% terminal growth rate. This valuation is supported by a 28.6 times price to estimated earnings multiple using our C2018 (excluding stock-based compensation) estimate (P/E). We believe that this target price and multiple are warranted, given our expectations for sustained growth in Commercial Cloud while generating incremental leverage. In addition, we believe that as more of MSFT's revenue stems from recurring sources (e.g., subscription / transactional revenue), this could lead to further multiple expansion. Thus, we rate the shares Outperform.

Risk: Risks to our \$115 target price and Outperform rating for MSFT are (1) competitive landscape, (2) acquisitions and potential impairment of goodwill / intangibles, (3) macroeconomic uncertainty, (4) server outages and disruption to online services, (5) cyber-attacks and security vulnerabilities, and (6) piracy / protecting intellectual property rights.

Please refer to the firm's disclosure website at <a href="https://rave.credit-suisse.com/disclosures/view/selectArchive">https://rave.credit-suisse.com/disclosures/view/selectArchive</a> for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names

Credit Suisse currently has, or had within the past 12 months, the following as investment banking client(s): MSFT.OQ, AMZN.OQ, AKAM.OQ, SPLK.OQ, CA.OQ, INTU.OQ, ORCL.N, RHT.N, SAPG.F, VMW.N, CRM.N, GOOGL.OQ

Credit Suisse provided investment banking services to the subject company (MSFT.OQ, AMZN.OQ, AKAM.OQ, ORCL.N, VMW.N, GOOGL.OQ) within the past 12 months.

Credit Suisse has managed or co-managed a public offering of securities for the subject company (MSFT.OQ, VMW.N) within the past 12 months. Within the past 12 months, Credit Suisse has received compensation for investment banking services from the following issuer(s): MSFT.OQ, AMZN.OQ, AKAM.OQ, ORCL.N, VMW.N, GOOGL.OQ

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (MSFT.OQ, AMZN.OQ, AKAM.OQ, SPLK.OQ, CA.OQ, INTU.OQ, ORCL.N, RHT.N, SAPG.F, VMW.N, CRM.N, GOOGL.OQ) within the next 3 months.

Credit Suisse makes a market in the securities of the following subject issuer(s): (MSFT.OQ).

Credit Suisse or a member of the Credit Suisse Group is a market maker or liquidity provider in the securities of the following subject issuer(s): AKAM.OQ, GOOGL.OQ, AMZN.OQ, CA.OQ, CHKP.OQ, INTU.OQ, MSFT.OQ, ORCL.N, RHT.N, SAPG.F, CRM.N, SPLK.OQ, VMW.N

A member of the Credit Suisse Group is party to an agreement with, or may have provided services set out in sections A and B of Annex I of Directive 2014/65/EU of the European Parliament and Council ("MiFID Services") to, the subject issuer (MSFT.OQ, AMZN.OQ, AKAM.OQ, SPLK.OQ, INTU.OQ, ORCL.N, VMW.N, CRM.N, GOOGL.OQ) within the past 12 months.

As of the end of the preceding month, Credit Suisse beneficially own 1% or more of a class of common equity securities of (AKAM.OQ).

Credit Suisse has a material conflict of interest with the subject company (ORCL.N) . Credit Suisse is acting as financial advisor to Aconex in relation to the proposed sale of the company to Oracle

The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at <a href="https://rave.credit-suisse.com/disclosures">https://rave.credit-suisse.com/disclosures</a>. For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse operating under its Global Markets Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks or So or its affiliates. The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yields. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-US customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. US customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the US.

Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or feduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials,management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment advisor for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment advisor to provide investment advisor y services to or on behalf of the municipality. If this report is being distributed by a financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission rate or the amount agreed with a

investment advice (impartial or otherwise). Copyright © 2018 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.
